

CETRA®

SYSTEM

A modern approach to the tradition of wood.

Strength, beauty, elegance, sophistication. Cetra has it all — along with the planning convenience of systems furniture, the warmth of wood veneers, the solidity of steel frames, and the design flexibility of a wide range of panels, finishes and trim. Plus, because Cetra is so strong, you can stack panels up to the ceiling and in extra long runs without wings, giving every part of the office, from reception desks to private conference rooms, the feeling of permanence and importance that only comes from wood.

tiles: wood: Toffee Cherry; fabric: Reflection Gold

seating: Stature, Cachet Toast;
Beo, Pollack Puff Daddy foxy brown, Toffee finish

Wood just where
you want it.

With Cetra, you can mix fabric, metal, glass and wood in almost any combination to achieve a distinctive interior statement. Go all the way with wood to create a formal, professional environment that lets clients know you take their business seriously. Lighten the look for managers

Beauty above and below.

Cetra's finishes are designed to integrate flawlessly with Kimball Office casegoods and tables, seating and Footprint components. You can coordinate paint colors, too. Wood doors and drawer fronts on strong metal frameworks let you get beauty up front and durability behind the scenes.

and other staff by adding some texture or color to tiles. No matter the combination, Cetra's rigid panels and steel-to-steel connections stay solid for decades to come.

seating: Stature, Maharam Level Straw;
Adagiato, Pollack Regatta sand, Toffee finish

● Build off the wall with Traxx.

Walls get to work, with Traxx.

Traxx, exclusively from Kimball Office, allows you to mount panels, storage, worksurfaces and tools directly to building walls. Increase planning flexibility, improve the efficiency of vertical space, make your walls more interesting.

High strength
for high traffic.

Today's fast moving workforce requires flexible spaces for teams to gather, sales people to make calls, clients to check emails, or vendors to crunch some numbers. With Cetra, even a standing-height, heavily-used, high-churn touchdown station is so solid it will last and look better, longer.

Work, meet, store.

Working space can also be meeting space with a half round end that encourages impromptu conferences. Use a Footprint storage cabinet for support, and on-the-go staff will have a place to store essentials for when they touch down at the home office.

tiles: wood: Ginger Cherry; fabric: Reflection Bronze
trim: Ginger Cherry, Satin Bronze Metallic

Footprint components
Worksurfaces: laminate, Sandstone
Storage: wood: Ginger Cherry; Bar pulls: Black Matte

seating: Xtreme stools, Maharam Level Illusion

Inviting elegance.

Offer a warmer welcome to guests, clients, staff, vendors and anyone else walking through your front door. Dress up Cetra sectional frames with flat shelves and give visitors a comfortable place to confer with colleagues, catch up with their computer, or relax with a cup of coffee.

Functional can be beautiful.

Mix and match slat tiles and flat shelves with fabric covered panels and you can create a space versatile enough to display cut flowers, provide reading material, post important information, and make everyone comfortable, all at the same time.

tiles and trim: wood: Ginger Cherry; fabric: Reflection Gold

Maharam Around Pool (bolster), Ginger finish

Division and definition.

Give a division or department its own, distinctive space by creating offices within the office. With Cetra, you get multiple panel heights from 30" all the way to 118", and tiles in tackable acoustic, wood, glass, or any combination, even if they're different on each side of the panel. Add sectional tiles of fabric, slat,

Let the light in.

Infuse office areas with natural light without compromising privacy by adding glass tiles in the corner and as stackers. A little sunlight is just the thing to improve everyone's point of view.

pass-through, ventilated, paint, glass or wood to create privacy, encourage collaboration or define functional areas. A coordinated free-standing table from our Footprint collection makes instant meeting space.

tiles: wood: Ginger Cherry; fabric: Times Square Antique White
glass tiles: Clear glass, Taupe Metallic frames
slat, trim and work tools: Taupe Metallic, Ginger Cherry

Footprint components
worksurfaces: wood: Ginger Cherry
storage: wood: Ginger Cherry; Arc pulls: Satin Nickel

seating: Skye, Essence Walnut, Platinum Metallic finish;
Adagiato, Pollack Regatta sand, Ginger finish.

Just a touch of wood.

Cetra is equally comfortable in the back office, mail room, as hoteling stations or for administrative functions. The solid panels and tiles will stay strong and look great, longer. Use wood as an accent in storage and worksurfaces — design coordination can encourage staff collaboration.

Design opportunities, everywhere.

Cetra panel fabrics and seating upholstery are offered in harmonious colors, and casegoods and storage come in matching finishes. It's all designed so you can keep your office style in sync.

seating: Wish, Pollack Regatta shoreline, Platinum Metallic finish

Bring people together.

Cetra responds to the modern way people work with fresh finishes and flexible setups that let individuals concentrate at their desks or come together as teams. Casual conference areas make impromptu collaboration easy. Slat tiles and shared storage keep everything organized and close at hand.

A new point of view.

Coordinate or contrast finishes, trim and fabrics to give definition to teams, functions, departments or to define individual workstations. A glass panel provides visual connectivity while maintaining quiet and privacy.

Communicate success, inspire confidence.

Cetra offers elegance and refinement so even the open plan conveys a feeling of permanence that makes a lasting impression.

-

Details such as stacking panels, hinged doors and wood trim, panels, tiles and glass panel frames make it simple to customize your offices and create the built-in look customers of professional service firms expect.

-

Steel structure and J-channel connections provide the strength and durability that ensure good looks over many years.

-

Because Cetra's panels offer 2 5/8" of steel-to-steel connected strength, you can create longer runs and have fewer wing panels, giving you as much wood as you want, even in the most open plan.

-

Coordinating finishes, paint colors, dimensions, fabrics and colorways allows for perfect integration of all office components across the entire floorplan.

trim profile: Flat, Toffee Cherry

trim profile: Softened, Toffee Cherry

trim profile: Transitional, Toffee Cherry

A touch of trim.

Trim is available in a soft, rounded profile, a more formal, square edge or a fluted, transitional shape that coordinates with other wood furniture. Whether painted or wood, the choice is yours.

Cetra panels are available as monolithic or sectional. Add 7", 12", or 19" stackable panels in one- or two-high combinations at any level, and you can build up to 118".

- 1 Frame: steel structure and durable construction
- 2 Monolithic panel: available in tackable acoustic, wood, glass, combination and curved glass
- 3 Sectional panels and tiles: available in fabric, slat, pass-thru, ventilated, paint, glass and wood
- 4 Stackable panel: available in fabric, wood, glass, combination and ceiling power entry
- 5 Mid-wireway panel: provides electrical and communication access at worksurface (fabric only)
- 6 Top caps/end trim: available in wood finish or paint
- 7 Wireway covers: available painted, with or without receptacle cutouts
- 8 J-channel with top and bottom connector brackets: steel-to-steel connection, bottom to top, ensures strength and allows for longer panel runs
- 9 Connectors: join panels to each other at 90°, 120°, 135°, 180°, or to the wall or Traxx at 90°
- 10 Traxx starter panel: mount directly to building walls instead of running panels parallel to the wall
- 11 Floor-to-ceiling top channel: seals gap between top panel and ceiling to block light and sound; features 2" of adjustability
- 12 Brackets: mount Footprint worksurfaces and overheads to panels at 1" increments in the J-channel
- 13 Load bar: attaches in the J-channel to support work tools; matches panel widths
- 14 Ceiling or floor power entry: available in 8-wire, 10-wire or hardwire electrical systems

e-magine it with Cetra.

To help you plan, specify and visualize your new offices, ask your Kimball Office representative to bring it to life with our e-magine software. You can review finishes, floorplans and more.

CAD Details from Kimball Office makes design easy. Just go to our website, and you'll find furniture symbols that can simply be dragged and dropped into your CAD-based program. Inspiration, in the form of floorplans, renderings and product photos, is also available.

Our commitment to sustainability.

Kimball Office and our parent company, Kimball International, have a long-standing commitment to sustainable practices in all of our operational, design and manufacturing procedures. This commitment is reflected in a wide range of management decisions, from using scrap lumber and sawdust to heat our buildings, to making wise material choices, building durable products that can be reconfigured and upgraded, and working with voluntary organizations such as the Green Building Council, which is dedicated to education and promotion of sustainable building practices. At Kimball Office, sustainable practices make good sense, and good business.
